

## Freedom Fone v1.6.5-04 to v1.6.5-05 upgrade

A number of bugs have been fixed since the limited release of the v1.6.5-04 distribution. Once you have installed v1.6.5-04 OR, following these instructions to update to v1.6.5-05 OR LTS Q2-2011.

Do not enter the # character in the commands detailed below – this character simply indicates that you are typing at the command prompt.

1) Click on the “Terminal” icon (the small black screen icon in the bar towards the top of the screen)  
Enter password ‘lupinus’

2) Navigate to the downloaded file from the command line

```
# cd /home/lupinus/Downloads (replace path with your path)
```

3) Unpack the tar archive

```
# tar -xvf update_1.6.5-04_TO_1.6.5-05.tar
```

4) Navigate to update script

```
# cd update_1.6.5-04_TO_1.6.5-05
```

5) Run script

```
# bash ./lupinus_update_1.6.5-04_TO_1.6.5-05.sh
```

6) Reboot your computer
