

Freedom Fone 2.0.1 to 2.0.3 upgrade

See the [Changelog](#) listing below for the bugs fixed by this upgrade patch.

Once you have installed 2.0.1, follow these instructions to update to 2.0.3.

Do not enter the # character in the commands detailed below – this character simply indicates that you are typing at the command prompt.

1) Click on the “Terminal” icon (the small black screen icon in the bar towards the top of the screen)
Enter password ‘sekowei’

2) Navigate to the downloaded file from the command line

```
# cd /home/sekowei/Downloads (replace path with your path)
```

3) Unpack the tar archive

```
# tar -xvf update_2.0.1_TO_2.0.3.tar
```

4) Navigate to update script

```
# cd update_2.0.1_TO_2.0.3
```

5) Run script

```
# bash ./sekowei_update_2.0.1_TO_2.0.3.sh
```

6) Reboot your computer

7) Open the Freedom Fone interface

8) Look for the new version number – 2.0.3 – in the footer at the bottom of any page

Write to support@freedomfone.org if you have any difficulties.

Please view our [Known Bugs](#) page for additional useful tips and information.

Changelog

2.0.2 -> 2.0.3

** Automatic merge of new users*

Bug #630 Callers (not present as Users in Freedom Fone) are merged to one User with multiple phone numbers if they are processed in the same spooler batch

** Export of CDR reports*
